MCIC CRYSTAL

MCIC crystal is known for its exceptional durability and aesthetically captivating versatility in tabletop presentations.

The Desire Line

The art of vinification goes beyond traditional mastery. It's the affection, that brings wine lovers, and glassmakers together to co-create an exquisite crystal stemware.

Every single glass is uncompromisingly clear and brilliant, co-designed and co-created by Lucaris and the Hong Kong Sommelier Association - Greater China. Aerlumer® - the bottom curl lines at the bowl makes for an unprecedented appreciation experiences.

Aerlumer®

Encourages micro-oxidation and softens the wine while swirling as it allows diversified interaction between wine and air, intentionally subtle to avoid effects when discovering colors of wines.

GLASS CARING

Prevent from Thermal Shock

- Allow glass to reach room temperature
- The thicker or heavier the glass, the more time needed
- Warm the glass to equalize the temperature difference
- Warm up the glass of uneven thickness develops various types of tension which lead to breakage
- Spot heat in microwave oven may result in breakage too

Prevent from Impact Shock

- Be gentle with your glass
- Avoid glass contact with bottle
- Never scoop with glass
- Never handle glass to glass contact
- Never pile glasses
- Never put flatware in glass
- Pour water into goblet before adding ice
- Do not use beer glass for juice, soft drink, etc., as

sugar coats the inside of glass affecting the carbonation of the beer

- Never place a hot drink glass on a cold metal surface
- Handle glass by the base or stem, never the rim
- Use the correct glass for each type of drink to ensure that the consistency, appearance and even taste are at their best
- Rinse the glass as soon as possible after use
- Use non-abrasive cleaner, nylon scrub or sponge in warm water
- Hold the glass by the bowl and do not twist the stem and the bowl in opposite directions while you scrub or dry
- When servicing, do not put too many glasses on a tray and do not carry them by hands.

Glass Cloudiness

- Hard Water

The hard water is basically base elements and compounds, i.e. lime, calcium etc. which creates cloudy glass. The only way to get rid of these base compounds is to use acid

- Chemical Reaction

It is the result of the oxide in the air stimulated by humidity and the oxide in the glass combining together. Hence it creates a thin film on the glass.

- Brighten Cloudy Glass

Fill the sink with hot water and add approximately (depending on your sink size) 2 or 3 cups of vinegar. Leave the glass soak in for an hour, the film should be gone. Using more vinegar will remove the film faster.

Custom Decorated Glassware

Make your trade name stand out!

A great way to increase the perceived value to any establishment and to stand out from the ordinary. It is a remarkably effective method to keep the trade name in front of the customer.

Also one can use this decoration for the pour line and consequently your establishment can have a better profit margin from the liquor and beverage sale.

Depending on the quantity, style and colors of your logo, we can decorate the glassware in variety of styles. This can be done with all of our glassware lines.

For more information contact your MCIC representative, or contact us at orders@mcicusa.com

Custom Decorated Flatware

A great way to increase the perceived value to any establishment and to stand out from the ordinary. It is a remarkably effective method to keep the trade name in front of the customer
